This story has been out there for at least a couple weeks. We don't think anything is needed right now.

Colleagues, sharing the following alert with you, in case we get any news inquiries. Is it worth having a statement ready, just in case? Let me know if you want to discuss.

Cheers, R.

Subject: BREAKING re: Glyphosate and chlorpyrifos

**BREAKING: U.S. Pressured Thailand To CANCEL
glyphosate ban!**

Are you outraged that the U.S. is doing Monsanto's
dirty work? Take EWG's survey!

This is outrageous, friend.

Four weeks ago, Thailand announced plans to ban three toxic pesticides, including glyphosate and chlorpyrifos. These chemicals are linked to serious health harms, like cancer and brain damage in kids!

But news broke that the U.S. bullied Thailand into delaying the ban of chlorpyrifos and CANCELLING its glyphosate ban.

Ridiculous! The U.S. should stand up for public health, not pesticide industry profits.

EWG is fighting to spread the truth about pesticides and get glyphosate and chlorpyrifos out of our food. But we need your help. The pesticide industry is fighting back, calling our pesticide work "propaganda," and the government has Monsanto's back.

We need 6,782 supporters to take our quick survey before 11:59 p.m. to show the pesticide industry that public opinion is on our side.

Are you outraged that the U.S. is doing Monsanto's dirty work?

YES

NO

Thanks for your feedback, friend.
